Current Situation

Pakistan's 2025 monsoon season has been declared a national calamity where the northern regions like Khyber Pakhtunkhwa (KP) and Gilgit Baltistan (GB) have been severely affected by the floods, cloud bursts and landslides. The torrential floods and landslides have led to significant destruction, with severe damage since the mid of August.

The Disaster Management Authority declared nine districts as calamity hit regions where the powerful torrents of water and debris, swept away whole villages in Buner, Swat, Swabi, and Shangla. The devastation is immense, resulting in a significant number of deaths and a profound effect on infrastructure and livelihoods.

This flood's human toll is a tragedy, with more than 830 people dead and 1,121 injured throughout the country. The most significant impact has been in the mountainous areas, as more than half of deaths occurred in KP province. Communities in regions like Buner and Swat are reeling from the sudden cloudbursts, and many people are still missing, leaving families broken. The crisis has also displaced more than 150,000 people, with nearly 8,977 homes damaged or destroyed, leaving many families homeless and facing a dire humanitarian situation.

The Flood Forecasting Division (FFD) has reported exceptionally high flood levels at headworks on the Ravi and Sutlej Rivers. As of 30 Aug. 2025, Balloki on the Ravi recorded 223,385 cusecs, while Ganda Singh Wala on the Sutlej registered 253,068 cusecs. High flows were also observed at Sulemanki (154,219 cusecs), while levels at Shadara and Sidhnai on the Ravi showed a decline from yesterday.
