## WEATHER FORECAST

Widespread heavy to very heavy rains are expected across Murree, Galiyat, Islamabad/Rawalpindi, Northeast Punjab, KP, Balochistan, GB, and AJ&K, likely causing flash floods in local nullahs/streams and hill torrents, particularly in D.G. Khan, Mansehra, Kohistan, Dir, Swat, and Balochistan. Intense downpours may trigger landslides/rockfalls in hilly areas and urban flooding in low-lying parts of Islamabad, Rawalpindi, Gujranwala, Lahore, Sialkot, Sargodha, Faisalabad, Peshawar, and Nowshera. Isolated hailstorms and windstorms pose risks of injuries, damage to crops, orchards, infrastructure, and vehicles, while thunderstorms may increase lightning strike hazards. Electricity and other utilities could face disruption. The public is advised to avoid outdoor exposure during rains and wind, remain cautious of loose structures (billboards, poles, solar panels, etc.), and follow safety advisories. Farmers should plan agricultural activities considering hailstorms, while tourists and travelers in mountainous areas must stay vigilant about flash floods, mud/landslides, and road blockages during this spell.
